I pay for my subscription for Satellite Radio, and I firmly believe that no one should have the ability to influence what I hear and do not hear on any of my satellite radio stations. For the NAB to attempt to limit what satellite radio offers is insulting at best, infuriating at worst. I subscribe to satellite radio almost entirely for the reason of escaping the strict confines, limited airplay and idiot disc jockeys of standard radio; so for the same group that has made listening to standard radio impossible to now try to attempt to influence what I can hear on a service I'm paying for is obscene. Please resist any efforts (with HR 4026 or petition 04-160) on the behalf of the NAB to influence in any way the services that satellite radio offers.

Thank you,  
Scott Blanchard, age 39, registered voter and XM Radio Subscriber
